

KEPPEL LAND INDONESIA intensifies COVID-19 safety measures by applying *BRShield self-disinfecting coating at high-touch areas. The initiative is part of maintaining a safe environment for tenants, customers and colleagues at the International Financial Centre Tower. At IFC, the priority is to ensure the safety and well-being of colleagues, customers and the community when they are at the premises.

The *BRShield anti-microbial, self-disinfecting coating is able to kill germs and bacteria that come into contact with it and lasts for up to six months.
